The Wilson Heater with the celebrated Hot Blast Down-Draft is the only heater which actually burns all of the fuel put into it. The Hot Blast Down-Draft creates perfect combustion and the fumes which rise from the fuel, ordinarily escaping unburned in other stoves, are all consumed and turned into heat in the Wilson. It has been ascertained that the fumes which arise from the fuel constitute 40 per cent of the entire heating power of the fuel. Buy a Wilson and get all the heat you are paying for.

A Heart-to-Heart Talk

by a merchant who knows—with customers who want to know—about
Good Clothes

EVERYBODY knows, now-a-days, that only a few obstinate men continue to have their clothes made to order. Perhaps they do it because they dislike the term "ready-made." In most cases they like to pay for a fashionable tailor's label, these are the only two plausible reasons. On the other hand there is every reason why a man should economize when he can get absolutely the best there is to be had by patronizing the clothing store that he knows can meet his requirements. It then becomes largely a question of quality and right price. We know exactly where we stand on this question; and in offering a complete line of our guaranteed clothing we present clothing that stands pre eminent in the quality of its goods and workmanship, and unsurpassed for the style features. We commend it to your good judgment.
